

I am shanker, I have 9 years of working experience as a full stack software developer. I worked in several domains such as banking, health, finance, insurance based projects. I mostly worked in a backend platforms with microservices, APIs and data driven systems and also worked in the frontend using JavaScript, TypeScript and various frameworks like Angular, Node.

Presently I am working at CIS TEC as a full stack developer in the backend team, where I designed and developed many backend features and worked on enhancing and creating new APIs for the platform.
